Bachelor of Computer Science - Software Engineering

personal details

My name is Shane Kenzler and I am a happily married, forty year old Father of three girls. My passions are graphic design and music. For the last eight years the majority of my career has occurred within the Sign Industry but I have also been involved in Newspaper Publications.

My qualifications include a Bachelor of Computer Science majoring in Software Engineering. My major focus became the Digital Media subjects.

I really enjoy the creative nature of Graphic Design and the challenge of problem solving to get the best result for the client.
